Content module 2. Practical aspects of brand management

Theme 7. Integrated Communications in Brand Management. Communication process and marketing communications. The essence of integrated marketing communications. Planning of integrated marketing communications as a basis for brand development.

4. Evaluation of the results of teaching

The system of evaluation of the developed competencies of students takes into account the types of classes, which according to the curriculum include lectures, seminars, practical classes, as well as independent work. Evaluation of the developed competencies of students is carried out using a 100-point accumulation system. In accordance with the Provisional Regulations "On the Procedure for Evaluation of the Results of Students' Learning Based on the Accumulated Point-Rating System" of S. Kuznets KhNUE, control measures include:

- current control carried out during the semester at lectures, practical, seminars, laboratory classes and is evaluated by the sum of the points scored (maximum amount - 100 points);

- modular control carried out in the form of a presentation as an intermediate mini-exam on the initiative of the teacher, taking into account the current control over the relevant content module and aims to get an integrated evaluation of the student's learning outcomes after studying the material from the logically completed part of the discipline - content module;

- final / semester control, conducted in the form of a test, according to the schedule of the educational process.

The procedure for carrying out the current evaluation of students' knowledge. Evaluation of student's knowledge during seminars, practical and laboratory classes and doing individual tasks is carried out according to the following criteria:

- understanding, degree of mastering of the theory and methodology of the problems under consideration; the degree of mastering of the actual material of the discipline; acquaintance with the recommended literature, as well as contemporary literature on the issues under consideration; the ability to combine theory with practice when considering production situations, solving tasks, performing calculations in the process of performing individual tasks and tasks submitted for consideration in an audience; logic, structure, style of presentation of the material in written works and speaking in the audience, ability to substantiate their position, generalize information and draw conclusions; arithmetic correctness of doing an individual and complex calculation task; the ability to conduct a critical and independent assessment of certain problem issues; the ability to explain alternative views and the presence of their own point of view, the position on a certain problematic issue; application of analytical approaches; quality and clarity of reasoning; logic, structuring and substantiation of conclusions on a specific problem; independence of work; literacy of presentation of the material; use of comparison methods, generalizations of concepts and phenomena; registration of work.
The general criteria for evaluating extracurricular independent work of students are as follows: depth and strength of knowledge, level of thinking, ability to systematize knowledge on specific topics, ability to make sound conclusions, possession of categorical apparatus, skills and techniques for doing practical tasks, ability to find necessary information, carry out its systematization and processing, self-realization at practical studies and seminars.

**The final control of knowledge** and competences of students in the discipline is carried out on the basis of a credit, the task of which is to check the student's understanding of the program material in general, logic and interrelations between the individual sections, ability to use the accumulated knowledge creatively, ability to formulate their attitude to a particular problem of the discipline etc.

The result of the credit is shown in the corresponding column of the exam's "Information on the record of success".

A student should be considered certified if the sum of the points obtained on the basis of the results of the final / semester credit of academic performance is equal to or exceeds 60.

The total score of the points for the semester is: "60 and more points are credited", "59 and less points are no credit" and entered in the "Record of Success" of the academic discipline.

**5. Distribution of points by weeks**

*(specify means of evaluation according to the technological card)*
