4. The order of evaluation of studying results

The system of evaluation of the developed competencies of students takes into account the types of tasks, which according to the curriculum include lectures, seminars, practical studies, as well as independent work. Assessment of competencies gained by students is based on a 100-point accumulation system. In accordance with the Provisional Regulations "On the Procedure for Assessing the Results of Students' Learning Based on the Accumulated Score-Rating System of S. Kuznets KhNUE", control procedures include:

the current control during the semester at lectures and seminars is estimated by the sum of points;

the module control carried out in the form of a colloquium, taking into account the current control over the relevant content module and aims to integrate the evaluation of the student's learning outcomes after studying the material from the logically completed part of the discipline – a content module;

the final / semester control, conducted in the form of a final test, according to the educational schedule.

The current assessment procedure. Assessment of student's knowledge during seminars and performance of individual tasks is carried out according to the following criteria:

the degree of understanding and comprehension of the theory and problems under consideration; the degree of comprehension of the actual discipline material; acquaintance with the recommended literature, as well as contemporary literature on the issues under consideration; the ability to combine theory with practice when considering production situations, solving tasks, performing calculations in the process of performing individual tasks and tasks submitted in an audience; logic, structure, style of presentation in written works and presentations in the audience, ability to substantiate own point of view, to generalise information and to draw conclusions; the ability to conduct a critical and independent assessment of certain problem issues; the ability to explain alternative views and own point of view, position on a particular problem issue; application of analytical approaches; quality and clarity of reasoning; logic, structuring and substantiation of conclusions on a specific

problem; independence of work; literacy of presentation of the material; use of comparison methods, generalisations of concepts and phenomena; formatting of a work.

The general criteria for evaluating non-auditing independent work of students are: the depth and strength of knowledge, the level of thinking, the ability to systematise knowledge on specific topics, the ability to make sound conclusions, the possession of categorical apparatus, skills and techniques of performing practical tasks, the ability to find the necessary information, carry out its systematisation and processing, self-realisation on practical lessons and seminars.

The final control of the knowledge and competences of students for the discipline is carried out on the basis of the final test, the task of which is to check the student's understanding of the programme material in general, the logic and interrelations between the individual sections, the ability to use the accumulated knowledge creatively, the ability to formulate a student's attitude to a particular problem of the discipline etc.

A student should be considered certified if the sum of the points obtained on the basis of the final / semester test makes 100. The minimum number of points for the current and module control during the semester is 60.

The final score for the academic discipline is calculated by the points obtained during the current control using the accumulation system. The total score for a semester is: "60 points and higher – passed", "59 points and less – failed", and is entered into the discipline registry.
