Introduction

Abstract of the discipline Registration and financial statements preparation of business. Each entrepreneur, starting his activity, should clearly represent the need for the future in financial, material, labor and intellectual resources, sources of their receipt, and also be able to clearly calculate the efficiency of resource use in the business process. This is due to the fact that in the modern economy it is enterprises that produce the bulk of goods and services that satisfy human needs.

In a market economy, entrepreneurs will not be able to achieve stable success if they do not clearly and efficiently plan their activities, constantly collect and accumulate information about the status of target markets, the position of competitors in them, and about their own prospects and opportunities.

For all the variety of forms of entrepreneurship, there are key provisions that are applicable in almost all areas of commercial activity and for different firms.

The purpose of the course " Registration and financial statements preparation of business " is to create the foundation of knowledge in the field of entrepreneurship and business. The tasks of mastering the discipline are: consideration of laws and principles by which a business develops; existing problems from the point of view of the employee, manager, owner of the enterprise and society as a whole; mechanism for creating enterprises, the organization of business and its effective management. The goals and objectives of the Basics of Business discipline are to give bachelors the necessary knowledge and skills, including: - Theoretical knowledge of the nature and types of entrepreneurial activity, the external and internal environment of enterprises functioning, financial and credit sources of ensuring their economic activity, about the advantages and disadvantages of the main organizational and legal forms of managing, about the advantages and problems of the development of small business; - Applied knowledge in the field of organizing one's own business, developing a business plan, state registration and licensing of entrepreneurs. Successful mastering of the discipline will allow you to master the special terminology and vocabulary of this discipline, as well as apply the knowledge gained in practice in the field of entrepreneurship.

Characteristic of the discipline

Academic year	2
Semester	4
Number of credits ECTS	5
Final assesment	pass

Prerequisites	Postrequisites
Financial aspects of starting and developing business	Financial diagnostics and value-based estimation of business

Competencies and learning outcomes of the study

Competencies	Learning outcomes
Ability to develop a business idea for creating your own enterprise, conduct market analysis and develop a business plan for an entrepreneurial idea	Ability to conduct strategic market analysis
Ability to register and accompany own business in tax and financial aspects	Ability to choose the most suitable form of business organization
	Ability to understand advantages and disadvantages of the general tax system. The procedure and features of determining the object of taxation
	Ability to generate and analyze financial statements of a business

The program of the academic discipline
Content module 1: The market analysis and business planning

Theme 1. Market analysis

1.1. The market analysis methods and tools.

A market analysis is a quantitative and qualitative assessment of a market. It looks into the size of the market both in volume and in value, the various customer segments and buying patterns, the competition, and the economic environment in terms of barriers to entry and regulation.

1.2. The characteristics of industries and the choice of a niche for creating a business.

A market analysis studies the attractiveness and the dynamics of a special market within a special industry. It is part of the industry analysis and thus in turn of the global environmental analysis. Through all of these analyses, the strengths, weaknesses, opportunities and threats of a company can be identified.

Composition of assets and liabilities of the balance sheet. Content of individual items in the balance sheet. The procedure for determining the financial result of the activity. Relationship between the balance sheet and the income statement.

8.4. Financial statements of small and micro enterprises.

Features of preparation and submission of financial statements for small and micro enterprises. Content of individual items in the balance sheet and the statement of financial performance.

8.5. International Financial Reporting.

Scope of International Financial Reporting Standards. Comparison of financial statements by national and international standards.

Teaching and learning methods

Activation of educational and cognitive activities of students and their interest in the process and results of educational work is provided not by individual fragmentary activities, but by the qualitative organization of all components of the educational process.

Activation of educational and cognitive activities of students during the teaching of the discipline "Registration and financial statements preparation of business" is associated primarily with new forms, methods and teaching aids, called "active methods". Among them: business game, problem lectures, mini-lectures, method projects, brainstorming, seminars-discussions, work in small groups.

The main differences between active and interactive teaching methods from traditional ones are determined not only by the methods and techniques of teaching, but also by the high efficiency of the educational process, which is manifested in: high motivation of students; consolidation of theoretical knowledge in practice; raising students' self-awareness; formation of the ability to make independent decisions, the ability to work in a team and make collective decisions; formation of the ability to social integration; acquisition of conflict resolution skills; developing the ability to find compromises.

The procedure for evaluating learning outcomes

The system for assessment the effectiveness of the training of specialists in the discipline provides that the results of the academic discipline should take into account lectures, practice classes,

as well as the performance of independent work. Assessment of the developed competencies among students is based on a 100-point accumulation system.

Control measures include:

current control, carried out during the semester during lectures and practical classes, and estimated by the sum of the points scored;

modular control, which is conducted taking into account the current control over the corresponding content module and is aimed at an integrated assessment of the student's learning outcomes after studying the material from the logically completed part of the discipline-content module.

Current control of this discipline is carried out in the following forms:

active work at lecture classes;

active participation in practice classes.

Modular control of this discipline is carried out as a colloquium. The colloquium is a form of verification and assessment of students' knowledge in the system of education in higher education institutions. Its conducted as an intermediate mini-exam on the teacher's initiative.

The procedure for carrying out the current assessment of students' knowledge. The current evaluation is carried out during the practical classes and is aimed at checking the level of readiness of the student to perform specific activities and the practical implementation of the existing competencies by the accumulation of ball scoring system according to the following criteria:

the degree of assimilation of the actual material of the discipline;

the ability to combine theory with practice when considering situational tasks, solving tasks, performing calculations in the process of performing individual tasks and tasks submitted for consideration in an audience;

logic, structure, arithmetic correctness and style of material presentation in writing, ability to summarize information and draw conclusions.

The maximum points for active work in every lecture is 2 points, the maximum points for active participation in practice classes is 6 points (for practical studies 2 – 4, 6 – 7) and 6 points (for practical studies 1, 5, 8)

Criteria for evaluating non-auditory independent work of students. The quality of independent work is assessed in practical classes and modular control, which includes questions that were recommended for self-study. The general criteria for evaluating independent work of students are: the depth and complexity of knowledge, the level of thinking, the ability to systematize knowledge on specific topics, the ability to make informed conclusions, the possession of categorical apparatus, skills and techniques of performing practical tasks, the ability to find the necessary information, organize it and present it to others.

Modular control is carried out in the form of colloquia. There are 2 colloquia in the study of the discipline. Each colloquium includes 3 tasks to perform. The maximum points that can be obtained for each of the tasks is 5 points. When evaluating the tasks take into account the correctness of the partial calculations, the presentation of the necessary formulas and the correctness of their application, compliance with the progress of the task, the correctness of the final result, the validity of the conclusions. Correct execution of all actions allows to receive the maximum estimation for the task, absence of this or that action, the admitted mistakes reduces quantity of points.

The student should be certified if the sum of the points earned on the results of the final / semester test of success is equal to or exceeds 60. The total score in the points for the semester is: "60 or more points is counted", "59 and less points are not counted", and is entered in the Record of Success of the discipline. In case of getting less than 60 points student obliged to pay off after the end of the examination session in the deadline set by the dean of the faculty, but not later than two weeks after the beginning of the next semester.

**Transference of Simon Kuznets KHNUE Characteristics of Students' Progress
into the System of the ECTS Scale**

Total score on a 100-point scale	ECTS assessment scale	Assessment on the national scale	
		for exam, differentiated test, course project (work), practice, training	for pass
90 – 100	A	excellent	pass
82 – 89	B	good	
74 – 81	C		
64 – 73	D	satisfactory	
60 – 63	E		
35 – 59	FX	unsatisfactory	not pass
