With the help of the implementation of the economic and mathematical toolkit, the most significant indicators of social tension were formed and determined for each individual region of Ukraine and the country as a whole, among which the level of income and education are the most critical. The results of the study can be implemented in practice to normalize the social balance in the country, to overcome the disparities in the development of different segments of the population.

Keywords: social tension, population development disparity, social balance, human development index, model, analysis, assessment.
